

Guru Krish

Director | Enterprise AI Transformation, Governance & Security

gurukrish81@gmail.com · 512-426-1410 · Austin, TX · [linkedin.com/in/gurukrish](https://www.linkedin.com/in/gurukrish) · gurukrish.org · U.S. Citizen
ex-Google · ex-Amazon

Professional Summary

Director-level leader with 18 years driving enterprise transformation across AI, governance, security, and platform ecosystems at Google and Amazon. At Google, architected Corporate Engineering's AI/ML governance framework — unifying 50+ programs across 14 corporate verticals into a governed portfolio and building the financial model adopted across \$30M–\$50M in AI investments. Led Tigerforce, Google's enterprise security program for a \$500M Salesforce ecosystem — establishing 12 enterprise security and privacy controls that became the foundation for third-party SaaS governance and designing Risk Inspector, a mandatory compliance platform deployed across 150+ Salesforce instances. At Amazon, owned enterprise security strategy and architected a production LLM governance pipeline on AWS Bedrock — classifying 2,500+ access requests and reducing resolution time from 7 weeks to 1 week. Now leading Trust by Design, a published enterprise AI governance and transformation framework covering platform architecture, agentic AI controls, operating models, and responsible AI adoption. Expertise in NIST AI RMF, EU AI Act, GDPR, HIPAA, and CCPA.

Experience

Founder - Trust by Design (AI Governance & Enterprise Transformation Framework), Austin, TX, Jan 2026 – Present

- Published Trust by Design — an enterprise AI governance and transformation framework covering platform architecture, governance controls, operating models, risk tiering, agentic AI threat modeling, guardrail patterns, and implementation playbooks.
- Designed reusable governance and control architectures for enterprise AI deployments, including risk tiering, prompt injection defense, PII protection, output validation, human review workflows, and evaluation frameworks.
- Built AI-augmented governance workflows using n8n orchestration and prompt engineering to automate intake triage, risk classification, and governance artifact generation, reducing manual effort and accelerating decision-making.
- Developed enterprise AI transformation assets — operating models, portfolio governance frameworks, adoption playbooks, and implementation patterns for organizations scaling AI capabilities. Portfolio: gurukrish.org

Oracle – Security CTO, Senior Principal TPM (Offer: Jan 2026 - Role eliminated May 2026 prior to start date due to org restructuring)

Amazon – Security Data Intelligence, Senior Technical Program Manager, Austin, TX, June 2024 – Oct 2025

- Defined and owned enterprise security intelligence and measurement strategy, including Security Scorecard v2, standardized risk models, and executive reporting adopted across 70%+ of engineering teams, reducing repeat vulnerabilities 40% and improving visibility into enterprise risk posture.
- Architected and operationalized an AWS Bedrock-based LLM governance platform with risk-tiered controls, input validation, output filtering, and human review workflows; classified 2,500+ access requests and reduced resolution times from 7 weeks to 1 week

Google – AI/ML Strategy (Corporate Engineering), Senior Technical Program Manager, Austin, TX, Jan 2023 – Mar 2024

- Architected Google Corporate Engineering's AI/ML governance infrastructure from scratch — established mandatory evaluation framework (intake criteria, risk tiering, LLM reuse playbook) that unified 50+ siloed programs across 14 verticals into a single governed portfolio and directly influenced 2024 Corp Eng OKRs.
- Built the financial impact model in partnership with Finance — adopted across 30 AI programs representing \$30M–\$50M in investment, enabling structured AI roadmap prioritization and reprioritization of 5 programs to improve ROI.
- Led executive AI/ML SteerCo and QBR forums with 20+ Directors and SVPs, governing and prioritizing enterprise AI strategic investments across conversational AI, vector search, document intelligence, and model-reuse initiatives.

Google – HR Engineering (People & Culture), Senior Technical Program Manager, Austin, TX, Nov 2021 – July 2023

- Led enterprise HR platform transformation supporting ~180K employees — driving delivery across 20 cross-functional teams and engineering partnerships with 95% on-time delivery through operating model redesign, execution rigor, and stakeholder alignment.
- Reduced security vulnerabilities by 40% and improved manager efficiency 25% through a PoC-driven redesign of access provisioning and identity workflows.
- Saved 1,000+ hours annually by implementing automation and AI-assisted capabilities across security workflows in collaboration with product, engineering, and privacy teams.

Google – 3P Security & Privacy, Senior Technical Program Manager, Austin, TX, Nov 2019 – Feb 2022

- Led Tigerforce, Google's enterprise security program protecting a \$500M Salesforce ecosystem across 500+ instances — established 12 enterprise security and privacy controls covering ownership, monitoring, vulnerability management, data governance, and 3P SaaS requirements that became Google's standard for all third-party application onboarding.
- Designed Risk Inspector, a mandatory daily compliance platform across 150+ Salesforce instances — auto-escalated violations to SVPs, drove 40% enterprise risk reduction through automated decommission of ownerless instances, and eliminated 3,700+ redundant licenses.
- Established Google's CoE for Salesforce security — the only security-approved SFDC implementation team — reducing vulnerability resolution from 27 days to 2 days, S&P tickets from 58 to zero, and delivery time from 150 days to 10 days.

Google – HR Systems, Senior Technical Program Manager, Austin, TX, Aug 2018 – Apr 2020

- Directed modernization of HR and finance systems used by ~3,500 users supporting 180K employees — consolidated 100+ tools into unified Salesforce platform, migrating 76% of use cases within the first year with HIPAA-compliant data handling.
- Enabled \$200M+ Salesforce platform investment by defining system strategy, exit roadmap, and required privacy and engineering controls for safe handling of Google data.
- Led delivery across global teams (50+ engineers, 15 vendors) — reducing vendor costs by \$1.4M through optimized sourcing and delivery models.

Google – Attribution, Technical Program Manager, Mountain View, California, May 2014 – Aug 2018

- Scaled Attribution 360 platform across Ads and Analytics — increased adoption 20%, reduced customer onboarding from 6 months to 12 days, delivered \$500K+ in cost savings through workflow standardization.

Early Career Leadership Experience, Austin, TX (2007 – 2014)

- **Engineering Manager, Adometry (Aug 2013 – May 2014):** Led a frontend engineering team supporting attribution, optimization, and reporting platforms; improved system reliability and large-scale data validation.
- **Senior Manager, QA / Release Engineering, Rodan + Fields (Feb 2013 – Aug 2013):** Built and scaled global QA teams, implementing agile testing and release strategies across eCommerce platforms.
- **QA Manager / Scrum Master, Affiniscape (May 2007 – Feb 2013):** Built and managed distributed QA and release engineering teams across US, India, Ukraine, and Costa Rica — hired, developed and led engineers across multiple timezones in a high-growth SaaS environment.

Technical & Domain Expertise

- **AI Governance & Security:** Responsible AI & Model Governance (NIST AI RMF), AI Assurance, Model Risk Management, Human Oversight Frameworks, Security & Privacy (NIST CSF, GDPR, HIPAA, PCI-DSS, SOX), Identity & Access Governance, Enterprise Risk Management, Regulatory Compliance
- **AI Architecture & Platforms:** AI Platform Architecture, LLM Systems & Guardrails (AWS Bedrock, Vertex AI), Agentic AI Workflows, LLM Pipeline Design, AI-Augmented Workflows, Evaluation Frameworks, Prompt Engineering, n8n Orchestration, Python, SQL/NoSQL, AWS & GCP (BigQuery, Pub/Sub, Dataflow), APIs & Integrations
- **Leadership & Execution:** Enterprise Program Leadership (Director/Principal scope), Technical Program Management, AI Strategy & Roadmap, Enterprise AI Program Governance, Operating Model Design, AI Adoption Frameworks, Engineering Partnerships, Executive Decision Support, Cross-Org Alignment, Agile Delivery

Training and Certifications

- **AI & Governance:** Responsible AI & AI Governance, Generative AI & LLM Systems Fundamentals, NIST AI RMF
- **Privacy & Security:** CIPT – Privacy in Technology (IAPP), AIGP – AI Governance Professional (In Progress)
- **Cloud & Platforms:** Google Cloud Digital Leader, Data Engineer – GCP, Salesforce Certified Administrator

Leadership & Impact

- Founder, Austin Cricket Association — scaled to 8 teams.
- Board Director, Central Texas Cricket League — supporting 50+ teams.
- Mentorship: Coached 100+ professionals on career growth and leadership.

Education

- **M.S.,** Electrical Engineering — Oklahoma State University, Stillwater, Oklahoma.
- **B.E.,** Electronics and Instrumentation Engineering — Annamalai University, India.
