

Guru Krish

Technology Program Leader | Enterprise AI Transformation, Governance & Security | Teams, Platforms & Operating Models
ex-Google · ex-Amazon · gurukrish81@gmail.com · 512-426-1410 · [linkedin.com/in/gurukrish](https://www.linkedin.com/in/gurukrish) · gurukrish.org · U.S. Citizen

Professional Summary

Technology leader with 18 years turning emerging technology into scalable enterprise capability across AI, platforms, security, privacy, and business systems. Earlier in my career, I built, hired, and managed global teams spanning engineering, product, QA, release, DevOps, database, network, project management, and BSA functions. At Google and Amazon, I led cross-organizational programs through matrix leadership, aligning 20+ teams, 50+ engineers, and 15 vendors. At Google, I owned the enterprise AI operating model across 50+ initiatives in 14 organizations and chaired the AI/ML SteerCo with 20+ Directors and SVPs, shaping \$30M–\$50M in AI investment. Separately, I led Tigerforce, the security and privacy program protecting a \$500M Salesforce ecosystem across 150+ business units. Today I run Trust by Design, an Enterprise AI Transformation advisory practice.

Experience

Trust by Design — Enterprise AI Transformation, Governance & Security, Principal Consultant · Austin, TX · Jan 2026–Present

- Lead an Enterprise AI Transformation advisory practice helping organizations move from AI experimentation to secure, scalable adoption through platform architecture, operating models, governance, security controls, and implementation playbooks.
- Built a working AI risk assessment demo (risk tiers, governance requirements, regulatory flags, architecture and model-routing recommendations, cost estimates) and published 8 reusable artifacts across BUILD, GOVERN, SECURE, and MEASURE, including an agentic AI threat model and an AI transformation playbook.

Amazon — Security Data Intelligence, Senior Technical Program Manager · Austin, TX · Jun 2024–Oct 2025

- Led program delivery across the Security Performance Insights and Security Data Intelligence teams; ML-powered analytics pipelines reduced ticket volume 80% and engineering overhead 70%.
- Defined enterprise security measurement strategy and launched Security Scorecard v2 through SVP and Director roadshows; adopted by 70%+ of engineering teams, reducing repeat vulnerabilities 40%.
- Architected two AWS Bedrock LLM security workflows (one in production, one pilot) with risk-tiering, human-in-the-loop review, and automated routing; the access-request workflow classified 2,500+ requests and cut resolution from 7 weeks to 1 week.

Google — Corporate Engineering, Senior Technical Program Manager · Austin, TX · Aug 2018–Mar 2024

Enterprise portfolio scope: 50+ AI initiatives across 14 organizations, security governance across 150+ business units, and HR platforms supporting ~180K employees.

AI/ML Strategy

- Owned Corp Eng's AI/ML governance infrastructure: an evaluation framework (intake criteria, risk tiering, LLM reuse playbook) that unified 50+ programs across 14 verticals into one governed portfolio and shaped 2024 Corp Eng OKRs.
- Chaired the AI/ML SteerCo and QBRs with 20+ Directors and SVPs; built the financial impact model with Finance across 30 programs (\$30M–\$50M), reprioritizing 5 for ROI; created an AI-augmented agile delivery method adopted across 15+ teams.
- Launched LLM-as-a-Service for 14 verticals, cutting TPU cost 50%, and coordinated TPU capacity planning with Core and TI resource planning teams.
- Delivered enterprise AI products: a RAG-based HR chatbot (–70% HR tickets), vector search (+80% result accuracy), and Document AI for Finance (\$250K saved).

3P Security & Privacy — Tigerforce

- Led Tigerforce, the security and privacy program for a \$500M Salesforce ecosystem spanning 500 instances across 150+ business units; formed a joint Google–Salesforce team, won SVP headcount for a centralized engineering team serving 1,000 engineers, and defined 12 NIST 800-53-based controls that became Google's 3P onboarding standard.
- Designed Risk Inspector, a mandatory daily compliance platform that auto-escalated violations to SVPs, cut enterprise risk 40%, and eliminated 3,700+ redundant licenses; its remediation playbook drew 17,000 views in 6 months.
- Established Google's Salesforce security CoE: vulnerability resolution 27 days → 2 days, S&P tickets 58 → 0, and business-unit onboarding 150 days → 10 hours.

HR Engineering & HR Systems

- Led delivery across 50+ engineers and 15 vendors to consolidate 100+ HR and finance tools into one Salesforce platform, migrating 76% of use cases in year one and cutting vendor costs \$1.4M.
- Defined the system strategy and privacy and engineering controls that enabled a \$200M+ Salesforce investment, with HIPAA-compliant data handling.
- Led HR platform transformation for ~180K employees across 20 cross-functional teams at 95% on-time delivery; redesigned access workflows to cut vulnerabilities 40% and lift manager efficiency 25%.

Google — Attribution 360, Technical Program Manager · Mountain View, CA · May 2014–Aug 2018

- Scaled Attribution 360 across Ads and Analytics (+20% adoption, onboarding 6 months → 12 days, \$500K+ saved); authored its SLO and OKR processes and led the dark-launch migration of all clients.
- Led cross-functional teams through client UAT, securing approval from 11 key clients on core features, and launched A360 in beta.
- Aligned release planning, backlog prioritization, and scorecards across six attribution products (A360, A360/Merge, Optimizer, Digital Plus, MMM, Adometry), translating complex attribution models into adoption strategies for executives, partners, and advertisers.

Early Career — Direct People Management · Austin, TX, 2007 – 2014

- **Engineering Manager, Adometry** (Aug 2013 – May 2014): managed engineers, product managers, QA, and release staff for attribution and reporting platforms; through Google's acquisition, drove the decommission of Adometry's data center and infrastructure, including vendor work.
- **Senior Manager, QA / Release Engineering, Rodan + Fields** (Feb 2013 – Aug 2013): managed QA, release, database, DevOps, network, project management, and BSA teams for global eCommerce platforms.
- **QA Manager / Scrum Master, Affiniscape** (May 2007 – Feb 2013): built, hired, and managed a 15-member team spanning QA, release, DevOps, project management, BSA, and product across the US, India, Ukraine, and Costa Rica.

Technical & Domain Expertise

- **Leadership & Execution:** Global team building and hiring, matrix leadership, operating model design, executive SteerCo and QBR leadership, portfolio and investment governance, vendor and SOW management, agile delivery at scale
- **Enterprise AI & Governance:** AI strategy and operating models, Responsible AI (NIST AI RMF), AI evaluation frameworks, model risk management, human oversight, enterprise risk management
- **AI Architecture & Platforms:** RAG, vector search, LLM platforms, AWS Bedrock (production); agentic AI, MCP, LangChain, n8n (prototypes and reference patterns)
- **Security & Privacy:** NIST 800-53, NIST CSF, GDPR, HIPAA, PCI-DSS, SOX, identity and access governance, 3P and SaaS security

Certifications · Leadership · Education

Certifications: AIGP — Artificial Intelligence Governance Professional (in progress) · CIPT — Privacy in Technology (IAPP) · Google Cloud Digital Leader · Data Engineer – GCP · Salesforce Certified Administrator

Leadership & Community: Founder, Austin Cricket Association (9 teams) · Chairman and Board Director, Central Texas Cricket League (40+ teams) · Former Google Career Coach and Noogler Coach; coached 100+ professionals

Education: M.S., Electrical Engineering — Oklahoma State University · B.E., Electronics and Instrumentation Engineering — Annamalai University, India
