ex-Google · ex-Amazon

Professional Summary

Technology leader with 18 years of experience leading enterprise transformation across AI, platforms, security, and engineering organizations at Google and Amazon. At Google, built the enterprise AI operating model across Corporate Engineering, establishing portfolio strategy, investment planning, executive governance, and reusable platform capabilities that unified 50+ AI initiatives across 14 business organizations and influenced \$30M–\$50M in strategic investments. Previously led Google's enterprise security platform strategy, designing Risk Inspector and security controls that became the standard for third-party SaaS governance across a \$500M Salesforce ecosystem. At Amazon, architected an AI-powered enterprise automation platform on AWS Bedrock that transformed security workflows and reduced access request resolution from seven weeks to one week. Developing Trust by Design, an Enterprise AI Transformation Platform focused on agentic AI architectures, AI operating models, security guardrails, governance, and enterprise AI adoption to help organizations operationalize AI with measurable business outcomes.

Experience

Trust by Design – Enterprise AI Transformation Platform, Austin, TX, Jan 2026 – Present.

- Developed Trust by Design, an Enterprise AI Transformation Platform enabling organizations to scale AI from prototype to production through platform strategy, reusable architectures, operating models, AI security guardrails, and governance patterns.
- Designed reusable enterprise AI architectures for agentic AI, LLM gateways, AI guardrails, prompt injection defense, evaluation frameworks, and AI risk controls aligned with NIST AI RMF and OWASP LLM Top 10.
- Built AI-powered workflows using n8n, LLM reasoning, prompt engineering, and workflow orchestration to automate AI intake, risk classification, decision routing, and implementation guidance.
- Published reusable implementation patterns, executive decision frameworks, and AI adoption playbooks demonstrating how enterprises can operationalize AI with measurable business outcomes. Portfolio: gurukrish.org

Oracle – Security CTO, Senior Principal TPM (Offer: Jan 2026 - Role eliminated May 2026 prior to start date due to org restructuring)

Amazon – Security Data Intelligence, Senior Technical Program Manager, Austin, TX, June 2024 – Oct 2025

- Defined and owned enterprise security intelligence and measurement strategy, including Security Scorecard v2, standardized risk models, and executive reporting adopted across 70%+ of engineering teams, reducing repeat vulnerabilities 40% and improving visibility into enterprise risk posture.
- Architected an AI-powered enterprise automation platform on AWS Bedrock using LLM reasoning, evaluation workflows, and human review to automate 2,500+ access requests, reducing resolution time from seven weeks to one week.

Google – AI/ML Strategy (Corporate Engineering), Senior Technical Program Manager, Austin, TX, Jan 2023 – Mar 2024

- Built Google's Enterprise AI operating model and product strategy across 14 Corporate Engineering organizations, defining AI intake, portfolio prioritization, reusable platform capabilities, investment planning, and executive governance that unified 50+ initiatives into a single enterprise AI portfolio and influenced \$30M–\$50M in strategic investments.
- Established the financial impact model in partnership with Finance — adopted across 30 AI programs representing \$30M–\$50M in investment, enabling structured AI roadmap prioritization and reprioritization of 5 programs to improve ROI.
- Led executive AI/ML SteerCo and QBR forums with 20+ Directors and SVPs, governing and prioritizing enterprise AI strategic investments across conversational AI, vector search, document intelligence, and model-reuse initiatives.

Google – HR Engineering (People & Culture), Senior Technical Program Manager, Austin, TX, Nov 2021 – July 2023

- Led enterprise HR platform transformation supporting ~180K employees — driving delivery across 20 cross-functional teams and engineering partnerships with 95% on-time delivery through operating model redesign, execution rigor, and stakeholder alignment.
- Reduced security vulnerabilities by 40% and improved manager efficiency 25% through a PoC-driven redesign of access provisioning and identity workflows.
- Saved 1,000+ hours annually by implementing automation and AI-assisted capabilities across security workflows in collaboration with product, engineering, and privacy teams.

Google – 3P Security & Privacy, Senior Technical Program Manager, Austin, TX, Nov 2019 – Feb 2022

- Led Tigerforce, Google's enterprise security program protecting a \$500M Salesforce ecosystem across 500+ instances — established 12 enterprise security and privacy controls covering ownership, monitoring, vulnerability management, data governance, and 3P SaaS requirements that became Google's standard for all third-party application onboarding.
- Designed Risk Inspector, a mandatory daily compliance platform across 150+ Salesforce instances — auto-escalated violations to SVPs, drove 40% enterprise risk reduction through automated decommission of ownerless instances, and eliminated 3,700+ redundant licenses.
- Established Google's CoE for Salesforce security — the only security-approved SFDC implementation team — reducing vulnerability resolution from 27 days to 2 days, S&P tickets from 58 to zero, and delivery time from 150 days to 10 days.

Google – HR Systems, Senior Technical Program Manager, Austin, TX, Aug 2018 – Apr 2020

- Directed modernization of HR and finance systems used by ~3,500 users supporting 180K employees — consolidated 100+ tools into unified Salesforce platform, migrating 76% of use cases within the first year with HIPAA-compliant data handling.
- Enabled \$200M+ Salesforce platform investment by defining system strategy, exit roadmap, and required privacy and engineering controls for safe handling of Google data.
- Led delivery across global teams (50+ engineers, 15 vendors) — reducing vendor costs by \$1.4M through optimized sourcing and delivery models.

Google – Attribution, Technical Program Manager, Mountain View, California, May 2014 – Aug 2018

- Scaled Attribution 360 platform across Ads and Analytics — increased adoption 20%, reduced customer onboarding from 6 months to 12 days, delivered \$500K+ in cost savings through workflow standardization.

Early Career Leadership Experience, Austin, TX (2007 – 2014)

- **Engineering Manager, Adometry (Aug 2013 – May 2014):** Led a frontend engineering team supporting attribution, optimization, and reporting platforms; improved system reliability and large-scale data validation.
- **Senior Manager, QA / Release Engineering, Rodan + Fields (Feb 2013 – Aug 2013):** Built and scaled global QA teams, implementing agile testing and release strategies across eCommerce platforms.
- **QA Manager / Scrum Master, Affiniscape (May 2007 – Feb 2013):** Built and managed distributed QA and release engineering teams across US, India, Ukraine, and Costa Rica — hired, developed and led engineers across multiple timezones in a high-growth SaaS environment.

Technical & Domain Expertise

- **Enterprise AI Transformation:** AI Strategy, Enterprise AI Platforms, AI Operating Models, AI Portfolio Strategy & Management, AI Adoption, Executive Governance.
- **AI Platforms & Engineering:** Agentic AI, LLM Platforms, LLM gateways, AI Guardrails, Evaluation Frameworks, Prompt Engineering, n8n, AWS Bedrock, Vertex AI, Google Antigravity, Python, APIs & Integrations.
- **AI Security & Governance:** AI Security, Responsible AI, AI Governance, NIST AI RMF, OWASP LLM Top 10, Identity & Access Governance, Enterprise Risk Management, Security & Privacy (NIST CSF, GDPR, HIPAA, SOX).
- **Leadership & Execution:** Enterprise Program Leadership, Executive Stakeholder Management, Cross-Functional Leadership, Technical Program Leadership, Platform Strategy, Roadmap Planning, Engineering Partnerships, Agile Delivery.

Training and Certifications

- **AI & Governance:** Responsible AI & AI Governance, Generative AI & LLM Systems Fundamentals, NIST AI RMF
- **Privacy & Security:** CIPT – Privacy in Technology (IAPP), AIGP – AI Governance Professional (In Progress)
- **Cloud & Platforms:** Google Cloud Digital Leader, Data Engineer – GCP, Salesforce Certified Administrator

Leadership & Impact

- Founder, Austin Cricket Association — scaled to 8 teams.
- Board Director, Central Texas Cricket League — supporting 50+ teams.
- Mentorship: Coached 100+ professionals on career growth and leadership.

Education

- **M.S.,** Electrical Engineering — Oklahoma State University, Stillwater, Oklahoma.
- **B.E.,** Electronics and Instrumentation Engineering — Annamalai University, India.
